Best phone system

topic:

the OS in phones

specific purpose:

to introduce and compare

general idea

Every one has a best system in his heart.

main points

1. In recent years, there have been many mobile operating systems, but now only two have survived.
2. A best system should have a user-friendly interaction mode
3. A best system should have a concise and efficient UI design
4. A best system may need to build a software and hardware ecosystem to ensure your experience.
5. Variety in need and hobby, everyone has the best system for his/her own.
